 7, 9 & 13 Watt Twin Tube 2-PIN with integral starter
 9-13W USA Quad 2-PIN with integral starter

DESCRIPTION:

The **I-13-EM-J** from IOTA Engineering is a UL Listed fluorescent emergency ballast that allows the same fixture to be used for both normal and emergency operation. In the event of a power failure, the **I-13-EM-J** switches to the emergency mode and operates **one** of the existing lamps for **90 minutes**. The unit contains a battery, charger, and inverter circuit in a single can. The **I-13-EM-J** can be used with most 7, 9, & 13 watt **2-pin** twin tube compact fluorescent lamps, with an initial output of up to **650 lumens** for one lamp. The **I-13-EM-J** is designed for installation on the fixture junction box and provides $\frac{3}{8}$ " flex for wiring to the test accessories. The test switch and charge indicator are provided for installation within a standard switch box for mounting adjacent to the fixture.

REMOTE MOUNTING

When battery packs are remote mounted, the remote distance can not exceed $\frac{1}{2}$ of the distance from ballast to lamp specified by the A.C. ballast manufacturer. For example, if the A.C. ballast manufacturer recommends no more than 25' remote distance, then the battery pack should not exceed 12 $\frac{1}{2}$ '. The maximum allowable remote mounting distance is 50' from the lamp.
