LPM

Emergency Power for Support of Egress Lighting

- 12 Volt, 50 and 75 Watts
- Sealed Lead Calcium Battery

Housing

- The LPM Series rough-in enclosure is fabricated from 20 gauge die formed galvanized steel
- The trim plate is fabricated from 12-gauge steel
- Available with choice of white or black trim plate colors
- Knockouts for conduit as well as screw hole knockouts for mounting to joists are conveniently location on the backbox

Battery

- Maintenance free, sealed lead calcium battery has an expected service life of 5 years
- The LPM50 Series uses two 100-1-136 batteries and supplies 50 watts at 12 VDC for 90 minutes
- The LPM75 Series uses two 100-1-188 batteries and will supply 75 watts at 12 VDC for 90 minutes

Illumination

- *See Selections on back page
- Suggested emergency power source for the "NightWatch" interior/exterior low level LED luminaire, the "LEF" MR16 exterior wall/soffit remote, and the "LRE" recessed MR16 exterior remote (See back page)
- Any 12 VDC remote emergency luminaire can also be powered by the LPM Series

Electronics

- 120/277 VAC, 60 Hz, Dual Input
- Utilizes an automatic voltage regulated charging system
- 2-state charger eliminates the need for periodic battery exercising
- It is recommended that a monthly load test of a minimum of (1) minute be performed and recorded to satisfy NFPA 101 life safety requirements
- Momentary test switch and normal power indicator lamp are located on the trim plate to assist testing and visual inspection
- Low voltage disconnect feature (LVD) prevents deep battery discharge

Code Compliance

- UL 924 listed
- UL 924 damp location listed optional* (50°F to 104°F)
- NFPA 101, NEC, BOCA, OSHA, and IBC illumination standards
- *50 watt models only

Warranty

Electronics: 3 years
 Battery: 1 year full, 4 years pro-rata

Suggested Specification

Furnish and install LightGuard's recessed emergency lighting model _____. The unit shall be constructed to meet Underwriter's Laboratories, Inc standard 924 and the National Electrical Code (NEC).

INSTALLATION AND OPERATION - Unit shall be easily field connected to a 120 or 277 VAC, 60 hertz, unswitched power source. The installation must comply with the NEC as well as other applicable codes. Upon utility power failure or brownout, the unit shall automatically and instantaneously transfer to battery power and maintain the specified load for a minimum period of 90 minutes. Upon restoration of utility power, the charger shall restore the battery to full charge within UL 924 requirements following a rated discharge of not more than 90 minutes.

CHARGING CIRCUITRY - The product shall utilize a fully automatic, voltage regulated charging system. The charging system shall maintain the battery at full capacity without the need for periodic exercising or equalization. The following features shall be standard: Low voltage disconnect (LVD), Brownout protection and a labor saving AC lockout which allows the contractor to fully connect the unit during installation prior to energizing the unit with utility line voltage.

BATTERY - The battery shall be sealed, maintenance-free lead calcium with a designed life of 5 to 7 years under ambient temperatures of 65°F to 85°F. The lead calcium battery shall be fully warranted for a period not less than one year.

HOUSING - The recessed back box shall be constructed of 20 gauge galvanized steel and be capable of installation into mechanical (T-bar) or sheet rock ceilings. The faceplate shall be constructed of 12 gauge steel and provide manual test switch and AC-on indicator status.
