- Lamp rotates 358° horizontally and 42° vertically
- Supplied with mounting frame and junction box
- Split mounting frame for old work – HP, adjustable mounting bars – ABI. 18" and 27" rigid mounting bars available
- Lamps are PAR36 sealed beam only – 6 or 12 volt
- Maximum lamp wattage is 50 watts

### DIMENSIONS

### DESCRIPTION

The RF Recessed Gimbal Series provides remote heads that are ideal for architectural or commercial applications where the aesthetics of a fully recessed unit are required. The slim profile is excellent for low ceilings and blends inconspicuously with existing recessed installations. For use as a remote when connected to an emergency battery source.
