

Introducing the new patent pending EXIT glow™ Exit sign.

UL 924 certified right reading EXIT sign available on the market today produced on .040 Aluminum substrate. This sign can be used as a replacement for electric exit signs providing a minimum of 5 foot candles (54 lux) of external unfiltered fluorescent illumination are present on the sign face at all times during building occupancy. Sign dimensions 8 1/2" x 15 3/4".

Features and Benefits:

- No Electricity required
- Made with temperature resistant material
- Available in Green, Red, or Black background
- Easy installation
- Environmentally friendly
- No electrical energy consumption
- No battery backup required
- Explosion proof
- Non toxic
- No costly service requirements
- 10 Year Warranty

[View of sign under normal operations](#)

[View of sign during power failure](#)

Unlike electric EXIT signs which rely on battery back systems during power failures EXIT glow™ does not. Instead of failing to operate approximately 30% of the time during power failures like normal electric EXIT signs EXIT glow™ simply works every time without fail!
